

**Total Turnkey Solution of  
Electrical and Mechanical Projects**

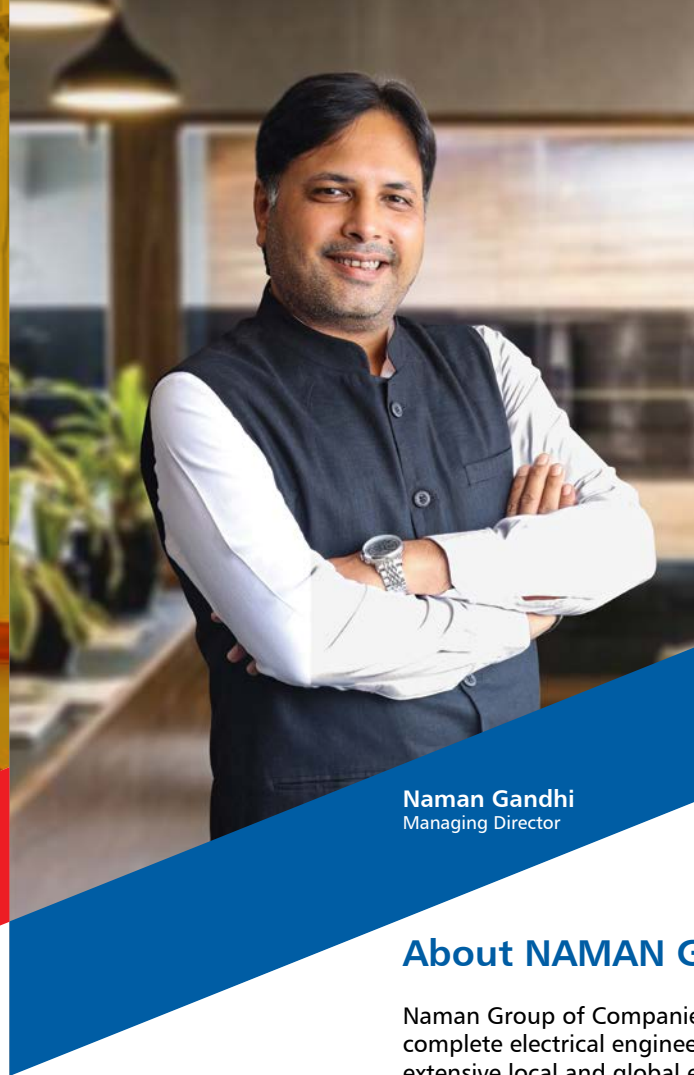

**NAMAN ELECTRIC PVT. LTD.**

**We understand our customers and are committed to our partnership with them.**

- ◆ Trusted provider
- ◆ Experience
- ◆ Company Equity
- ◆ End-to-end responsibility
- ◆ Global expertise
- ◆ Reliability (long-lasting solutions)
- ◆ Quality of service
- ◆ Customized solutions

**Naman Gandhi**  
Managing Director

“Based on mutual trust within and outside the company, we take pride in working together as a team to build synergies and drive growth.”

“We are committed to serving our customers, business partners and society by offering good workmanship and prompt service.”

## About NAMAN GROUP

Naman Group of Companies is one of the leading turnkey complete electrical engineering solution providers with extensive local and global expertise.

Established in 1978 with a humble beginning as an electrical equipment dealer for renowned electrical and engineering brands, Naman has achieved exponential growth through their robust understanding of the market needs and their competitive edge customized solutions.

Since last four decades, Naman have delivered turnkey projects successfully in diverse industries like Rolling mill, Paper mill, Engineering, Plastics, Textile, Food & Beverages, Pharmaceuticals, Road construction through an eye for detail and a customer-centric approach. We take pride in our commitment to quality and to our customers. This has been the foundation of our long successful journey and our mantra for an enviable track record.

## H.T. SUPPLY AND INSTALLATION NETWORK

H.T VCB, Distribution Transformer, Two Pole Structures, H.T. Electric cable, H.T. cable jointing kits, Earthing installation of the H.T. equipment, safety equipment & Accessories and other related H.T. Supply and Installation work.

## POWER SUPPLY AND INSTALLATION NETWORK

Medium Voltage Power Distribution Board, Motor Control Centers, PDBs etc., for Utility Equipment, Plant Equipments, Water Pump, Fire pump, Bore Pump, Sump Pumps etc., using latest switch gears and control gears, its Electrical cabling, electrical cables from the Electrical substation \ LT Electric room, Cable Tray, Earthing Installation for Body earthing and other related L.T. Electrical work. Power Factor improvement Capacitor automatic control panel and other related L.T. Electrical work.

## LIGHTING SUPPLY AND INSTALLATION NETWORK

Lighting, Distribution board for internal interior lighting. Including point wiring, lighting Fittings and Fixture, using modern lighting controller and switches, MCBs, fire retardant electric wires and pleasant lighting system matching with the mood ant task of the area with energy efficient lighting sources.

## EXTERNAL LIGHTING SUPPLY AND INSTALLATION NETWORK

External lighting pole, external lighting fittings & fixtures, lamps, Earthing, control panels and external lighting installation for walk way, flood lighting for open area lawn, facade lighting of the building and security flood lighting. Using decorative pole, energy efficient light sources etc.

## TELECOMMUNICATION NETWORK

Telephone Network for external line and internal line from main centrally located junction box including cabling and all EPABX and INTERCOM SYSTEM. Equipment's, instruments for internal and external telecommunication.

## CABLE TV NETWORK AND SECURITY SYSTEM

CATV Network distribution, signal cabling, installation etc. Signal to be taken from local cable network for Rooms & General area. Security system providing by close circuit TV (CCTV) and its cabling for entrance, parking etc.

## FIRE ALARM AND CONTROL SYSTEM

We provide Supply, Installation Testing and Commissioning for Fire Control System

- Hydrant Sprinkler Systems
- CO<sub>2</sub> Flooding System
- Emergency Fire Wall System

## MUSIC SYSTEM / PUBLIC ADDRESS SYSTEM (General)

Sound System Wiring for Common area like foyer, passage, lift and lift foyer, lobby etc., Point wiring, signal cabling, including music system and installation of the system, Speaker with control etc., the same system shall be used for public address system in emergency for General Area.

## COMPUTER NETWORK (Structural Cabling)

Computer LAN network & structure cabling for entire hospital from the central server to individual node using structure cabling hardware like patch panel, switches, hub, cat 5 / 6 computer cable, fiber cable etc.

## EMERGENCY POWER SUPPLY

Diesel Generator Set For emergency Lighting and Power of all internal lighting, including stair case, corridors, lobby, foyer, passage, toilets, Water pump, Escalators & Elevators etc., using Auto change over, cabling, earthing, and DG Set Installation.

## HVAC

Heating, ventilation, and air conditioning is the technology of indoor and very clear environmental comfort. Its goal is to provide thermal comfort & expectable indoor air quality. We provide supply & installation work.

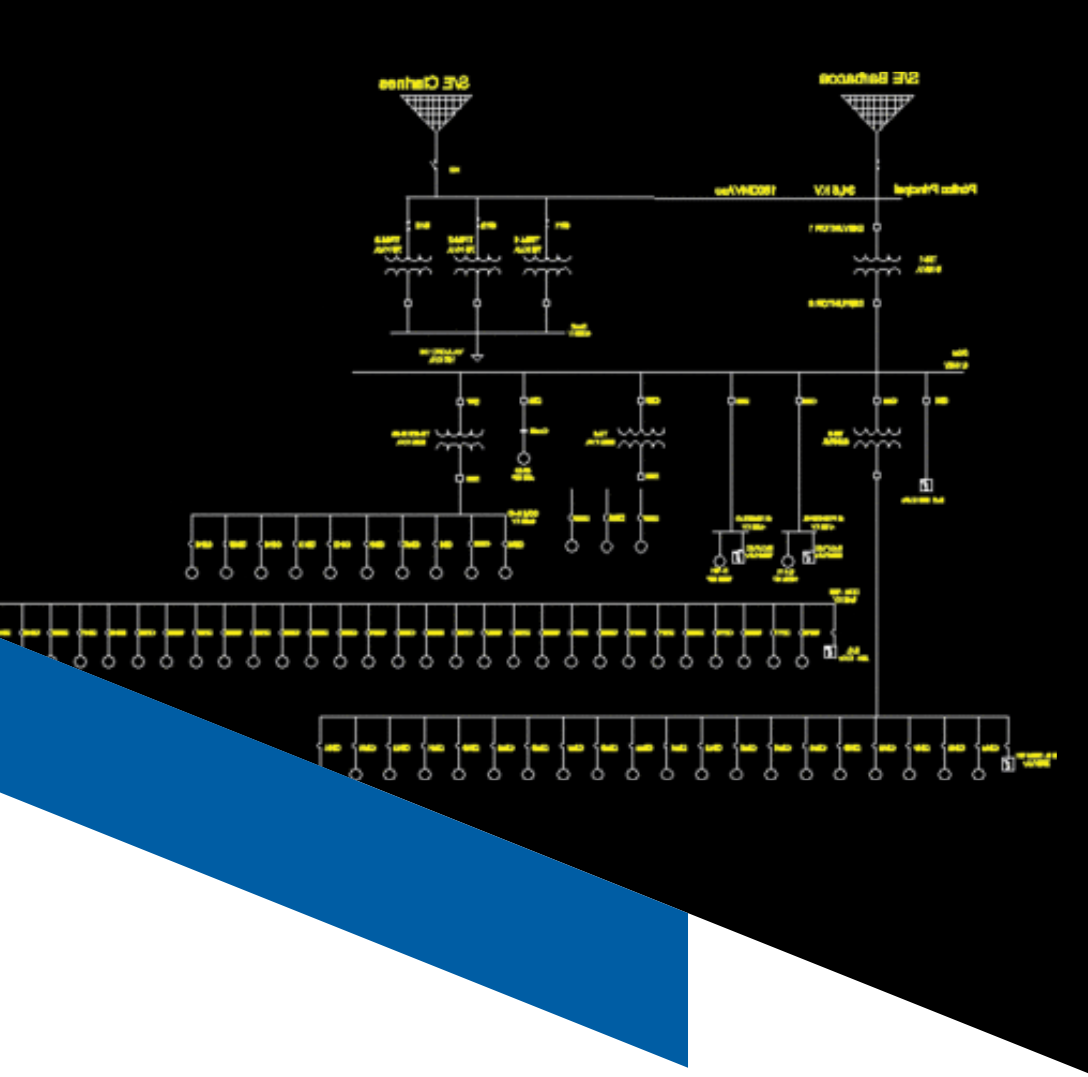

## ELECTRIC MONORAIL SYSTEM & BUS TRUNKING SYSTEM

EMS system also called overhead conveyor system that feed parts individually to single working station.

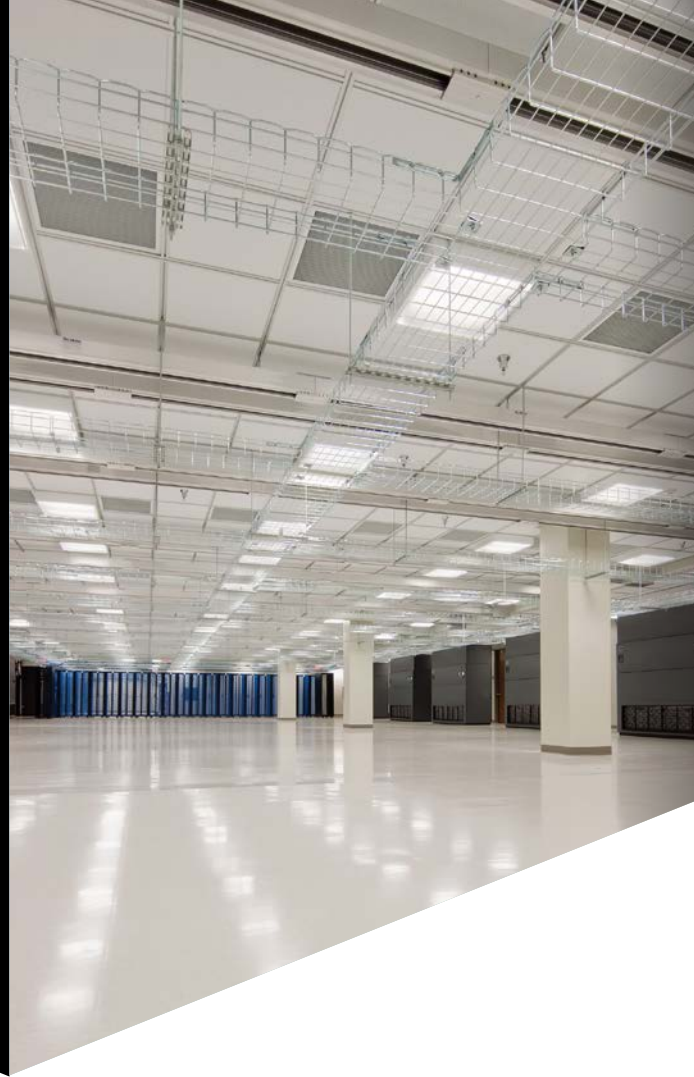

Bus bar trunking system is the system of distributing electrical power using copper or aluminum bus-bar with suitable enclosure & good amount of protection to prevent the cables from getting damaged due to foreign bodies.

## ELECTRICAL SYSTEM DESIGN

Depending on our customer requirement we provide electrical services. From Starting budget to implementation of the electrical work with end to end electrical project management responsibility.

## CABLE SUPPORT SYSTEM

The Support system for cabling and equipment is a vital component of a properly designed data communications system. There are six major type of cable support cable runway.

## The Right Solutions for Your Business

### UPS

UPS for emergency Lighting and  
Clean Power to machine and important  
equipment.
